Brainstorm & Idea Prioritization Template:

Brainstorm & Idea Prioritization

The brainstorming phase for the **HouseHunt – House Rental Management System** focused on identifying the challenges faced by tenants, landlords, and administrators in the house rental process. The team generated multiple ideas to improve property search, listing management, secure authentication, booking, and role-based access. These ideas were evaluated based on user needs, technical feasibility, implementation effort, and overall project impact. After prioritization, the most valuable and practical features were selected to develop a secure, user-friendly, and responsive MERN Stack web application.
