Maximum Marks	4 Marks

Data Flow Diagrams

A **Data Flow Diagram (DFD)** is a graphical representation of how data moves through the **House Rent Management System**. It illustrates how data enters the system, how it is processed, where it is stored, and how it is delivered to users. The DFD helps in understanding the interaction between users, the application, and the database, making the overall system easier to analyze and design.

Example: (Simplified)sa

User Stories

User Type	Functional Requirement (Epic)	User Story No	User Story / Task	Acceptance Criteria	Priority	Release
Tenant (User)	Registration	USN-1	As a user, I can register by entering my name, email, and password.	User account is created successfully and the user can log in.	High	Sprint-1
Tenant (User)	Login	USN-2	As a registered user, I can log in using my email and password.	User is redirected to the dashboard after successful login.	High	Sprint-1
Tenant (User)	Browse Properties	USN-3	As a user, I can browse and search available rental properties.	Matching properties are displayed successfully.	High	Sprint-2
Tenant (User)	Property Booking	USN-4	As a user, I can view property details and book a rental property.	Booking is saved successfully and a confirmation message is displayed.	High	Sprint-2
