

Project Design Phase

Problem – Solution Fit

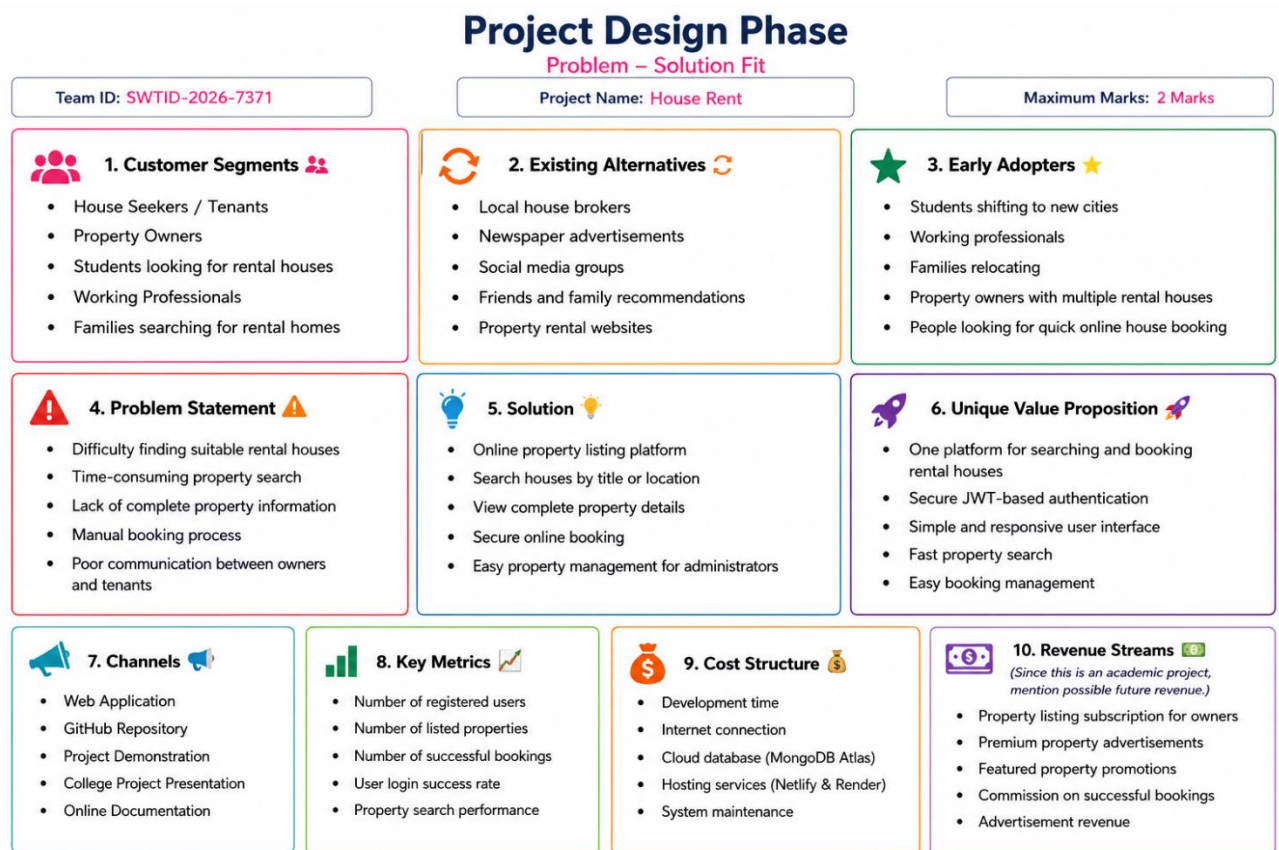

Date: 13-07-2026

Team ID: SWTID-2026-7371

Project Name: House Rent

Problem – Solution Fit :

House Rent Management System using MERN Stack

Summary:

Problem	House Rent Solution
Difficult to find rental houses	Centralized online property search platform
Time-consuming property search	Search by title and location
Lack of property information	Detailed property descriptions
Manual booking process	Online house booking system

Poor communication	Centralized property management
Insecure authentication	JWT-based secure login
Difficulty managing properties	Admin property management panel
Poor user experience	Responsive React-based interface
Data management issues	MongoDB Atlas cloud database
Limited scalability	MERN Stack modular architecture
